## **EMPLOYMENT OPPORTUNITY**

### **FIELD SERVICE ELECTRICAL TESTING TECHNICIAN/TECHNOLOGIST**

Pacific Powertech Inc. currently has an opening for an experienced electrical testing technician or technologist in its Port Coquitlam, B.C. location.

Our company has been providing high voltage equipment testing/commissioning services and engineering studies in BC since 1994. Our B.C. office is located on Kingsway Avenue in Port Coquitlam. We have built our company on a reputation for providing top quality service to large industrial, commercial, institutional, and utility customers. Our field services are very much enhanced by our ability to provide engineering assistance or input either during the commissioning stages on new projects, or to deal with troubleshooting issues on existing systems. We are also a full NETA (International Electrical Testing Association) member company that sets us apart from others in our industry.

The field service testing person's overall job responsibilities will include field maintenance, testing, and commissioning of power system equipment from 240V to 500kV. The successful applicant must therefore have a minimum of five years' testing experience, preferably with Protection and Controls experience.

Because specific job duties will range from testing of switchgear, breakers, relays, and transformers, to performing field studies and data gathering, this position requires solid technical and theoretical training. The successful candidate will need to have the ability to work both independently and within a team environment, and must be available to perform frequent weekend work and occasional out-of-town travel.

A very competitive salary will be offered and full group benefits are part of the compensation package. If you are interested in joining Pacific Powertech, please submit your resume via mail or email:

**Pacific Powertech Inc.**
